

Introducing the BG-1 Spring Compressor

A Must-Have Tool for T34 Mentor and Beech Bonanza/Baron Owners

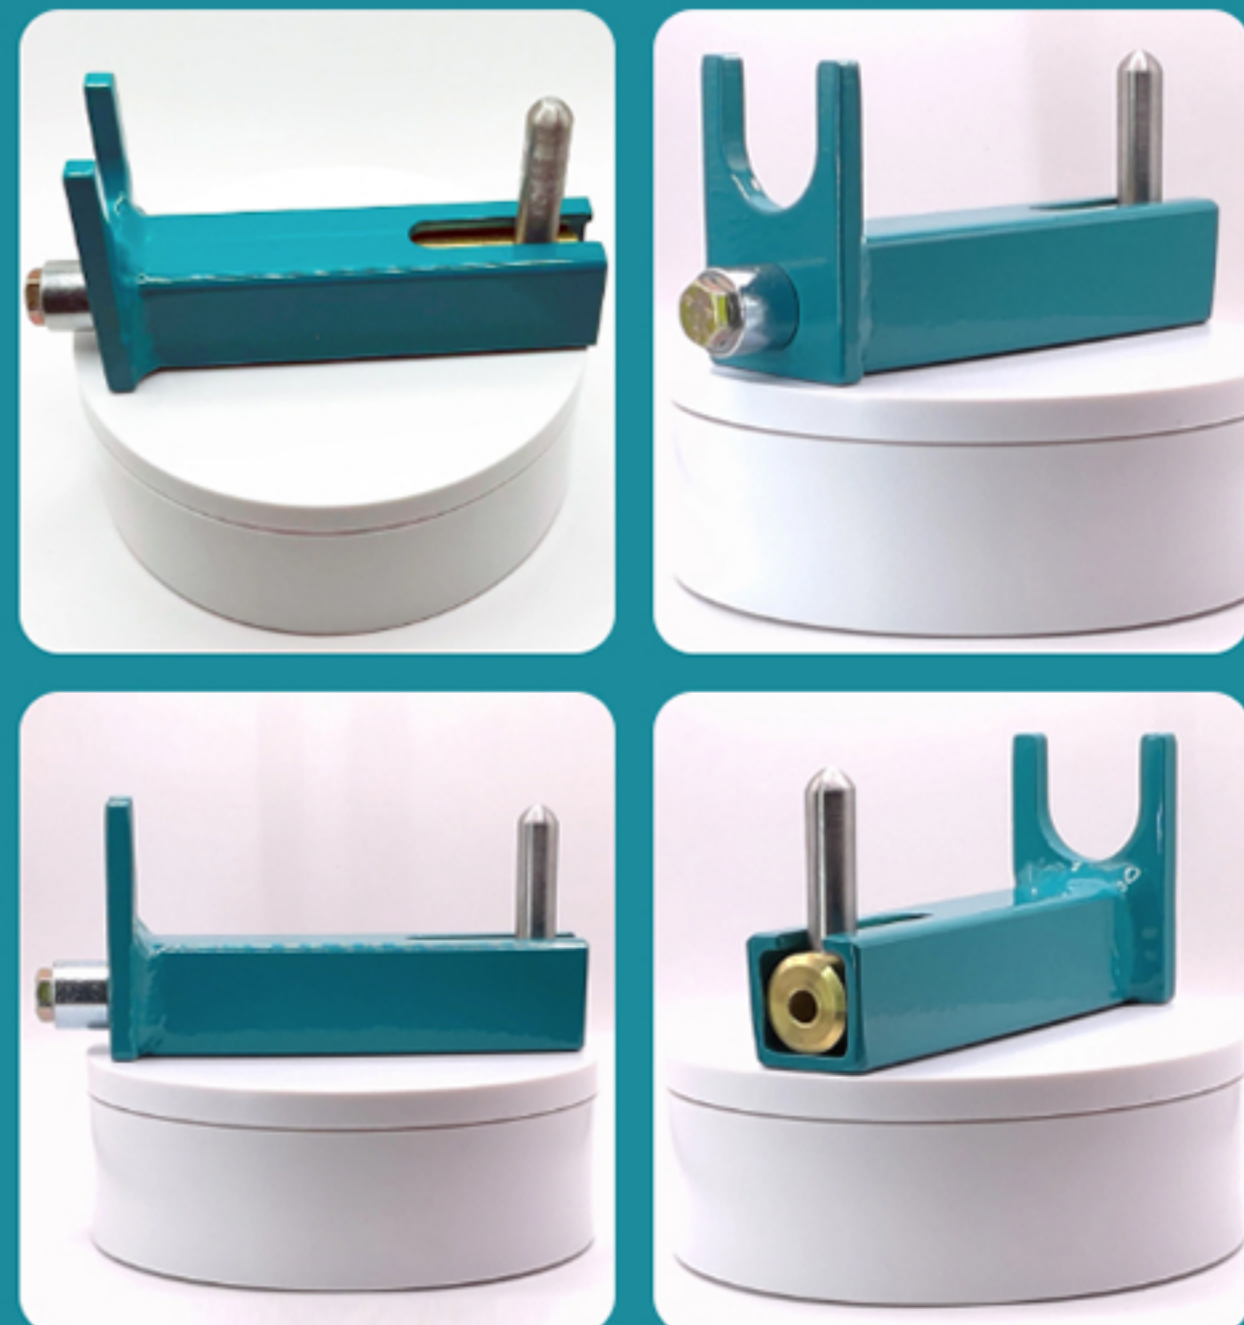

How it Works

The BG-1 Spring Compressor is designed to easily and safely compress the downlock spring to allow removal of the shear pin of the rod end slip joint. Makes adjusting spring tension quicker and easier.

Key Features

- Durable construction with steel, stainless steel, and brass
- Aircraft quality hardware
- Perfect for Bonanza, Baron, Travel Air, T34A/B owners/mechanics
- TIG welded and powder coated body
- Easy to use and clean

Now Available to the Public

Realizing that Beech Bonanzas and Barons use the same system, I'm offering the BG-1 Spring Compressor for sale to the public. This tool is constructed from high-quality materials, including steel, stainless steel, and brass. The bolt is a modified AN4-40, and the body is TIG welded and powder coated for durability and ease of cleaning.
